\*4 Current measurement option of PW3390

- For the PW8001, the phase compensation values of the sensors whose model names include the letter A apply automatically and are reflected in the setting.

- When using the CT9557, contact your Hioki distributor or retailer.

- When the VT1005 (high-voltage differential probe) is used, other typical values of phase difference are used for the setting.

See the separate document "Typical Values of Current Sensors' Phase Characteristics (when VT1005 is used)."
