

## Output Power Measurement of an Ultrasonic Cleaner

By measuring an ultrasonic cleaner's output power with the Hioki PW3335 Power Meter, it is possible to verify whether the cleaning process is being carried out properly.

- You can measure the power in the output frequency range of an ultrasonic bath.
- You can confirm that ultrasonic cleaning is performed properly by monitoring power values during cleaning.
- The PW3335 Power Meter can measure power at up to 1000V, 30 A, 100kHz.
