

LR5092-20 DATA COLLECTOR Operation Manual

EN

Thank you for purchasing the HIOKI LR5092-20 Data Collector.

This guide introduces the Data Collector's basic measurement procedure to first-time users.

HIOKI

Read First

Mar. 2021 Revised edition 1
LR5092B981-01 21-03H

Before using the instrument, be sure to read the Instruction Manual carefully.

1 Confirmation

Confirm package contents, and prepare needed items.

Data Collector and Accessories

LR5092-20

LR5000 Utility Program CD (PC application software)

Use this program when connecting the collector and a computer to configure the collector's settings or transfer the collector's data to the computer

Two LR6 alkaline batteries

Instruction Manual

Refer to this manual for operating procedure details, or when problems occur.

USB Cable

Use this cable when connecting the collector and a computer to configure the collector's settings or transfer the collector's data to the computer. See the Instruction Manual for details.

3 Connecting

Connect the Data Logger and Data Collector.

Place the logger and collector so that their IR ports are aligned.

■ Perform the pre-measurement inspections before you use the collector. (See the Instruction Manual for details.)

4 Collecting Data

Press the **COLLECT** button.

The display on the left is shown during data collection. When you want cancel data collection part way through: Press the **F3** button to return to the top display.

2 Preparations

Install the batteries in the collector, and then turn on the power.

Installing the Battery

- 1 Remove the battery cover from the back of the collector.
- 2 Install the batteries as shown.
- 3 Close the battery cover.

■ Take care to ensure the orientation of the + and - is correct when you install the batteries.

Turning the Power On

Press the **POWER** button. (Long press for approximately 1 second)

■ After use, always turn OFF the power.

5 Browsing Data

When collection is completed, the collected data appears on the display.

Displayed items: Channel, comment, data count, recording interval, serial number, recording start time, recording stop time, maximum value, minimum value, and average value

When the data of a logger which recorded on two channels is collected, use to switch channels.

Press the **F1** button to switch to waveform graph display, and **F2** button to switch the numerical value display. (To return to the previous display, press the **F3** button.)

Waveform Graph Display

Press the **F1** button to reduce the waveform, and the **F2** button to magnify the waveform.

Use to scroll the waveform.

(To return to the previous display, press the **F3** button.)

Numerical Value Display

Use the **F1** and **F2** buttons to decimate the data. (To return to the previous display, press the **F3** button.)

■ Data can be collected without stopping measurement on the logger. Data is collected up until the point in time when data collection was performed.
■ By default, the collected data is saved to internal memory.

Capabilities in Addition to Collection

Configure the Data Logger settings, check the recording/setting state, and control starting/stopping of recording

You can configure the settings of the LR5000 Data Logger series and control the starting and stopping of recording. (The settings can also be received from a Data Logger.)

You can check the recording/setting state of the logger, too.

Organizing Data

You can display a list of data, delete data, and format an SD memory card.

Self Checks

You can check whether there is a problem with the firmware, LCD, keys, buzzer, and SD memory card.

Basic Button Operations

1 Move the cursor and select menus and items with the buttons.

2 Execute items with the (ENTER button) buttons.

And (Or)

Execute **F** button menus with the **F** buttons.

■ See the Instruction Manual for details.

Operating Buttons

F1, F2, F3 button

Executes the F button menu.

COLLECT button

Collects the recorded data from the logger.

ENTER button

Executes the selected menu.

Cursor button

Moves the cursor.

POWER button

Press and hold this button (for approximately 1 second) to turn the power on/off. The power is turned off automatically (auto power off) when no operation is performed for approximately 1 minute.

Troubleshooting

■ No indications appear on the display when the **POWER** button is pressed.

Are batteries installed?

Did you press and hold the **POWER** button?

- Check that batteries are installed properly.
- Press and hold the **POWER** button for 1 second.

If the screen is not displayed after performing the above steps, the power protection element may be damaged. Contact the place of purchase or your nearest Hioki sales office because replacement and repairs cannot be performed by customers.

■ The power does not turn off when the **POWER** button is pressed.

Is the collector connected to a computer with a USB cable?

Did you press and hold the **POWER** button?

- The power will not turn off if the collector is connected to a computer with a USB cable. Disconnect the USB cable and then press the **POWER** button.
- Press and hold the **POWER** button for 1 second.

■ The power turned on even though the **POWER** button was not pressed.

Is the **POWER** button in a pressed state?

Is the collector connected to a computer with a USB cable?

- Check the **POWER** button.
- When the collector is connected to a computer with a USB cable, the power turns on even if the **POWER** button is not pressed.

■ Button operation is not possible.

Is one of the buttons in a pressed state?

Check the operation buttons.

■ Cannot collect data from a logger

Are the collector and logger placed correctly in position?

Is the communication IR port dirty or scratched?

- Place them correctly in position.
- Clean the IR port. If there is significant damage, the collector needs to be repaired. Contact the place of purchase or your nearest Hioki sales office.

■ The batteries are depleted too quickly.

Are the batteries supplied with the logger still being used?

Are manganese batteries being used?

Use new LR6 alkaline battery.

Indicators

SD Memory Card Indicator

Lit when an SD memory card is inserted.

Current Date

For the setting procedure, see the Instruction Manual.

Battery Status Indicator

F button menus

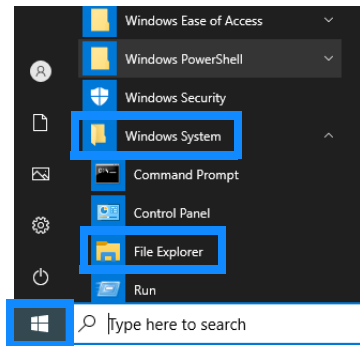

5 Importing and Displaying Data on a Computer

1 Installing the PC Application Program

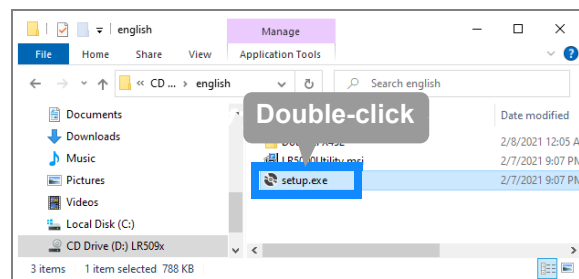

Required Items: Supplied CD

2. Click [Start] to display the application list. Click [Windows System]-[File Explorer] to start Explorer.

3. Double-click [setup.exe] (SET UP file).

- LR5000 Utility Program Operating Requirements
- CPU 1 GHz or faster processor clock
 - RAM 1 GB or more (32-bit), 2 GB or more (64-bit)
 - OS Windows 7, Windows 10
 - Library .NET Framework 4.5.2 or later
 - Interface USB
 - Monitor Resolution 1024 × 768 or higher
 - Hard Disk At least 30 MB free space (Additional space is required for storing recorded data)

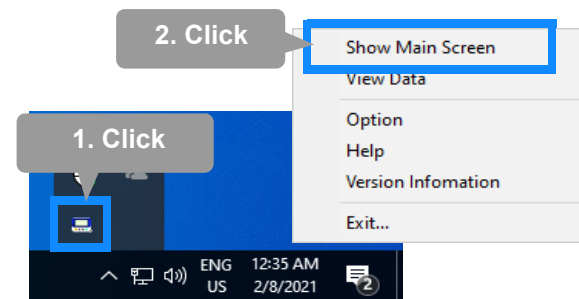

■ What if the PC Utility program cannot be installed?

- Be sure that the computer meets the above operating requirements.
- Carefully read "Installing the PC Application Program" in the Instruction Manual, and reinstall. Pay special attention to the following items.
 1. Be sure to log in using an Administrator account.
 2. Before installing, be sure to close any programs running on the computer.

2 Starting the PC Utility Program

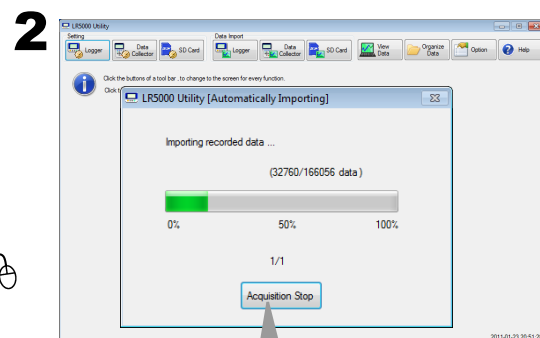

From the Windows [Start] menu, select **-[HIOKI LR5000 Utility Software]-[LR5000 Utility]** to start the program.

The program starts automatically from the next Windows logon, and the icon appears in the task tray (notification area).

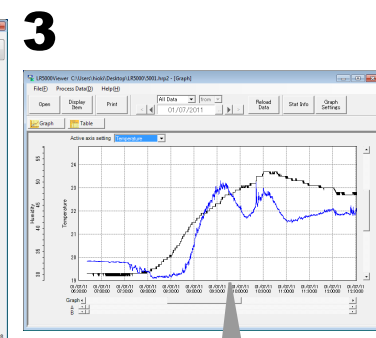

3 Importing (Saving) Recorded Data to a Computer, and Graph Display

Required Items: Supplied USB cable

Data is saved to a file.

PC Utility Program Features

Making Detailed Settings

Configure settings on the LR5000 "Data Logger" series loggers, and on the LR5092-20 Data Collector. The PC utility program can access settings that cannot be accessed from the logger itself.

For example,

- Set recording start/stop method and timing to start and stop recording automatically at scheduled times (Timer Measurements).

- Measurement data can be freely scaled for display (Scaling).

- Set upper and lower thresholds so that measurements outside of the range cause [AL] (Alarm) to appear on the logger screen (Alarm Judgment).

- Add comments to measurement data.

Processing Recorded Data

Process data imported to the computer.

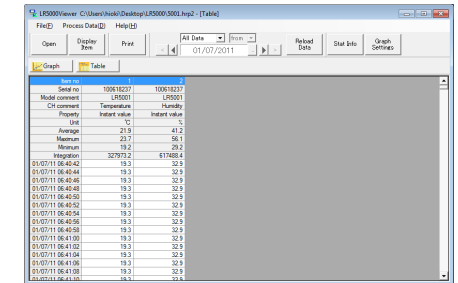

- Freely scale for display (Scaling)
- Calculate electric power easily (using clamp logger measurement values)
- Calculate energy cost easily (using clamp logger measurement values)
- Calculate duty cycle
- Integration
- Calculate dew-point temperature (using temperature/humidity logger measurement values)

Organizing Recorded Data

Sort data imported to the computer.

- Copy (files between folders)
- Move (selected files between folders)
- Delete (selected files)
- Combine (multiple recording files into one, and save with new file name)
- Extract (data for a specified period, and save with new file name)

Displaying Recorded Data in a Table

Printing Recorded Data

Example Graph Printout

■ See the Instruction Manual for details.
