

Model LR8410 Wireless Logging Station Supplemental Remarks for Instruction Manual

We provide a supplementary explanation for the instruction manual of Model LR8410 (LR8410B980-05).

Read the following explanation in conjunction with the instruction manual.

- “Bluetooth®”in the“Operation Precautions” section (p. 7)

Model LR8410 Wireless Logging Station can wirelessly communicate with Model LR8510 Wireless Voltage/Temp Unit and Model LR8511 Wireless Universal Unit at a line-of-sight distance of up to 30 m.

The presence of some obstacles, including walls and metal shields, may cause instability of wireless communications or decreases in communication ranges. In addition, radio wave intensities, which are indicated with the antenna-like indicators, vary depending on units even while these units are operating in the same environment.
