

Serial Number & Manufacturing Date of Hioki Products

9-digit serial numbers

The serial number of Hioki products consists of a total of 9 digits.

Among these, the first 2 digits represent the manufacturing year, and the next 2 digits represent the manufacturing month. Please note that the exact manufacturing day cannot be determined from the serial number.

e.g.: Product “CM3289” with serial number: 191045529

This indicates that the AC Clamp Meter CM3289 was manufactured on October 2019.

5-digit serial numbers

The first 2 digits represent the manufacturing year, and the next 2 digits represent the manufacturing month.

e.g.: Product “3481” with serial number: 2405

This indicates that the Voltage Detector 3481 was manufactured on May 2024.

SD cards, included accessories, and consumables items do not have serial numbers.
